

Associate Dean Research Report

Candidates or faculty promotions coordinators (depending on the faculty) will provide the associate dean research with the below summary tables and a copy of the application **before** the end of the promotions round. Please note that only some faculties require candidates to complete the below summary tables. Candidates are advised to contact their [faculty promotions coordinator](#) or refer to the [academic promotions website](#) for this information.

The associate dean research will complete this report **after** the academic promotions round has closed. All candidates will have the opportunity to sight these reports.

Applications from candidates not located in a faculty also require associate dean reports to be prepared. Candidates not located in a faculty should contact the Human Resources Division prior to submitting their application to the Deputy Vice-Chancellor (Education) for assistance with this process.

The tables below are designed to provide committee members with a brief overview of research activities (they do not replace the detailed information in the case for promotion). Please extend boxes if required.

Summary table – Research (to be completed by candidate)

To access information in relation to whether you are required to complete this table, please contact your [faculty promotions coordinator](#) or refer to the [academic promotions website](#).

Overview of research achievements
